Notes: Rates are calculated per 100,000 resident population. Non-resident cases were excluded when calculating rates. Cases with unknown county of residence were included when calculating total rates for Arizona. *Streptococcus pneumoniae* is lab reportable only. *Haemophilus influenzae* type b includes all invasive *H. influenzae* type b, not just meningitis, and are age group specific rates. Meningococcal disease includes all invasive disease caused by *Neisseria meningitidis*, not just meningitis. Rates of invasive Streptococcus Group B in infants <90 days are per 1,000 live births.
